

8th International Symposium on Human Survivability 7 November 2019

Symposium Hall, International Science Innovation Building (West) 5F, Yoshida Campus
Kyoto University, Kyoto, Japan

“Human Survivability Studies (HSS) and the Sustainable Development Goals (SDGs) in Asia”

Organizer: Graduate School of Advanced Integrated Studies in Human Survivability (GSAIS)

Co-Organizers: Asian Future Leaders Scholarship Program (AFLSP) at Kyoto University and
UNESCO Chair on Water, Energy and Disaster Management for Sustainable Development (WENDI)

This international symposium focuses Sustainable Development Goals (SDGs) in Asia, which is the most developing area in the world in terms of population growth, industrial and agricultural development, and economic growth. The area also has many risks such as environmental degradation, natural disasters, and social instability. Inviting a couple of keynote speakers who provide insights about hot issues in Asia, the GSAIS faculty members and students of GSAIS will discuss their own research interests in relation to SDGs with the keynote speakers and other participants and will achieve some conclusion how to further enhance human survivability studies for solving global issues.
